

## Husbands Scores with Lift Contract

With World Cup fever hitting the UK a Birmingham lift company has scored after securing a contract at Goals Birmingham at Star City to fit two disabled passenger lifts.

Husbands will be installing the lifts, which will transport wheel chair users between the bar and café area, changing rooms and the training facilities at Goals' newest site - Star City in Birmingham. The venue will feature ten 5-a-side pitches on an elevated deck.

The installation of the two Meta 250 lifts ensures the site meets all the requirements of the Disabled Discrimination Act. It is estimated that the installation will be completed by mid June and the project is worth £40,000 to the company, which is based in Shelah Road, Halesowen.

Commenting on the project, Husbands' commercial manager Simon Morgan says:

“The new lifts ensure that all areas of Goals Star City are accessible to people with disabilities. In addition to meeting legal requirements the design features of the lift also mean that it complements any environment and so provides the perfect solution to disabled access. The lift can be installed in a matter of days and is affordable and practical.”

Goals is the UK's premier provider of new soccer centres for 5-a-side play - offering floodlit rubber-crumb synthetic grass pitches for use by the general public.
