

Trolley Lifts

A generation of expertise in Trolley Lift manufacture

This range of lifts has been manufactured, supplied and installed to a worldwide market since 1963. They have been used in some of the UK'S most prestigious buildings and for a variety of clients including restaurants and bars, libraries, hospitals, universities, local/national government buildings, museums and retail centres.

Control of our own manufacturing facility means flexibility in meeting clients demands and installation requirements and ensures the lifts of traction design are built in accordance with UK and European Standards.

Technical specifications

Model 2250 lifts with door entrances on the front only or in a thru car arrangement

Rated Load	MOTOR			CAR**				SHAFT		HEADROOM	
	Rating	Position	Speed	Width <i>CW</i>	Door Width	Depth <i>CD</i>	Height	Width <i>SW</i>	Depth <i>SD</i>	Pit Depth***	Top Driven
250kg	1.57kw	Top of Shaft	0.32m/sec	1000	1000	1000	1200	1400	1200	200	2100

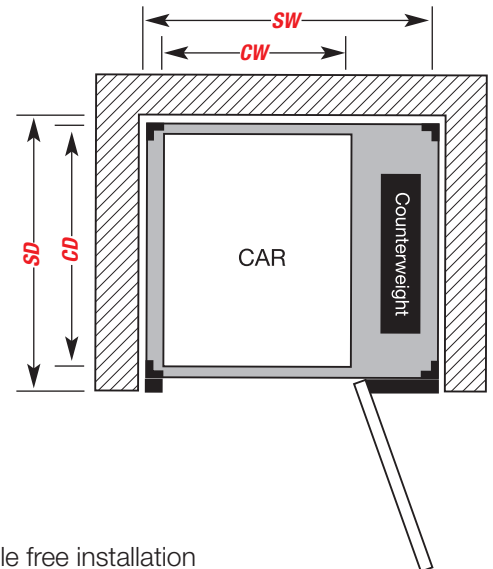

* Bespoke cars with adjacent entrances are also available.

** Where a "Drop Bar" is fitted to prevent items falling from the car when in motion 40mm should be deducted from the car depth for each entry.

*** A pit is normally required at the lowest level to enable the lift floor to be flush with the building floor. Where this is impracticable a suitable ramp can be constructed to enable wheeled access.

Design and Performance

- Efficient and quiet 1.5kw 3 phase motor
- Rugged 1.5mm steel car with galvanised or stainless finish
- Welded self supporting structure enables maximum use of available space
- Hinged landing door enables full width access to car
- Tested and run at UK factory prior to installation ensures on time trouble free installation
- Full site survey, and project management service including drawings and builders work instructions
- Modular construction allows quick, normally same day installation times

Options Include

- Bespoke car size or finish to clients specification
- Illuminated car
- Intercom
